

Item no.: 340225 70031 - Treasure Chest - 190 Components

Product Description

Treasure Chest - 190 Components

This small treasure chest seems to have sprung from a fantasy novel. Extremely ornate carvings and a locking mechanism that puzzles: Treasures or secrets can be hidden in the little box. However, this model from Ugears also delights with its steampunk style, because the creation combines modern and ancient elements. When opening and closing the chest, gears interlock in a clever way. Only insiders are familiar with the mechanism.

The intricately designed treasure chest can hold jewelry or small, cherished keepsakes. Like all our models, it is available as a kit. Opening the chest is done as follows: After turning the lid clockwise, a key can be removed there with a short turn to the right. On the front side there are openings in a circular arrangement. By inserting the key there and turning it to the right again, you open the lid and access the contents. Our building instructions also clearly illustrate how to open the box. The filigree chest is mysterious and at the same time extremely decorative.

Warning! Not for children under 3 years.

- Number of components: 190
 Setup time: 4-5 hours
 Model size: 14th.2 x 14.2 x 9.1 cm
