Product Description

LKW "Heavy Boy"-Truck VM-03 - 541 Components

There are people who have gasoline in their blood and there are those without. The asphalt cowboys and trucker babes of the dust-dry road certainly know a thing or two about it. Nothing seems more beautiful than a ride on a high-horsepower road behemoth. With the HEAVY BOY TRUCK VM-03, model building specialist UGEARS(R) is creating a memorial to this road-loving target audience, and in the process is outgrowing itself.

The detailed reproduction of the 18 ton truck becomes a retro-futuristic miniature work of art in the form of 541 individual parts, revealing every mechanism under its hood. At the same time, the HEAVY BOY TRUCK VM-03 is as unique as all models of the brand manufacturer. Both the mechanics and the appearance characterize the learning factor of steampunk, which brings to the fore the technical achievements of the steam engine. The direction of travel and the gear of the chassis are transferable to a rubber band motor that knows how to drive the woodwork precisely. The brand manufacturer UGEARS(R) has consequently outdone itself and offers an R6 engine in conjunction with a coupling system that can also pull a trailer. The still life is the perfect collector's item for every truck lover and an eye-catcher in every driver's cab.

Warning! Not for children under 3 years.

- Number of components: 541
- Setup time: 8-9 hours
- Model size: 38 x 13.5 x 17.8 cm
