43,13 EUR

Item no.: 352295
shipping weight: 1.00 kg
Manufacturer: UGEARS

Product Description

UGEARS Mechanical model kit Pick-up Lumberjack, 460 components, 3D wooden puzzle.

This vintage truck is really pretty to look at, but it's not just for looking at. The Ugears Pick-up Lumberjack is a work truck that has a job to do, which is to haul lumber (or hay bales or implements - whatever you can imagine)! The DIY wooden model is based on the popular 1959 Chevrolet 3100 and has a 1m x 7mm spring engine (like the powerful Ugears Drift Cobra). This allows the pickup to travel up to 6 m and carry loads of 400 to 450 g on the truck bed. The rotary knob is stylised to resemble an open-topped air filter protruding from the bonnet. Lift the bonnet to see the beautiful V8 engine that really hums!

The pick-up Lumberjack has 3 modes: R (reverse), N (idle), D (forward). The energy of the spring is transferred to gears to increase the gear ratio and then via the gearbox to the drive shaft, differential and rear axle. With a start/stop mechanism in the bed, you can start the truck on command. Because at Ugears we focus on the small, quirky details that make a model exceptional, a small pendulum under the seats simulates shaking from the powerful engine. Curved plywood gives the model beautiful lines and a 1950s style. The doors of the pickup can be opened from the inside and outside and the tailgate can be folded down. The front wheels can be turned with the steering wheel and locked for elegant cornering. The Lumberjack pick-up also has front and rear suspension so you won't get bounced around too much on the country roads.

Take a trip back in time, to the woods, with the Pick-up Lumberjack from Ugears. The sun has risen. The mist has lifted, leaving dewdrops on the forest's carpet of moss and ferns. You have enjoyed a hearty breakfast of pancakes, eggs and bacon - in the diner in town they call it the "lumberjack special". You're ready for work and so is your trusty Chevy truck. You find the old logging road at the edge of the forest and follow the tracks into the dark green heart of the forest. Your muscles are still burning from yesterday's work, your shin is a little bruised from the impact of the log, but your body is energised and yearning for real work. You are strong, confident and happy in a way that only people who work outdoors know.

You pull off the road, set the truck closer to the trees and unload your equipment. Birdsong and the buzzing of insects fill your ears. The damp smell of plants, loamy earth and the smell of petrol surrounding the truck delight your heart. You check the oil in the saw. It's ready to go. Three powerful pulls and it starts. Even before the sun rises, the bed of your pick-up Lumberjack is piled high with felled logs. You drive back the way you came, on the only road that leads into these forests - the road you and your trusty truck know so well.

The Pick-up Lumberjack from Ugears is the latest addition to our ingenious collection of trucks, cars, motorbikes and other vehicles. The Pick-up Lumberjack model kit consists of 460 parts, has an "Advanced" difficulty level and offers more than 8 hours of fun to assemble. If you like trucks, check out the VM-03 heavy boy truck with trailer, the UGM-11 vintage truck with its additions or the self-contained tanker or fire truck. Start your collection of wooden model trucks today. But that's not all! The Ugears catalogue of 3D puzzles, DIY model kits, automatons, robots, wooden puzzle boxes and STEM Lab model kits has all kinds of fascinating, ingenious and charming models for every taste and interest.

With Ugears mechanical models and 3D puzzles, the fun doesn't stop after the building. Their pick-up truck with fascinating details, moving parts and spring motor is meant to be played with and enjoyed, not just looked at. The wooden Pick-up Lumberjack model can be assembled right out of the box - no special tools or glue required. Just follow the detailed, illustrated instructions in 11 languages (English, German, Ukrainian, French, Polish, Spanish, Russian, Japanese, Italian, Chinese and Korean) to build it. If a part breaks during assembly, email us at customerservice@ugearsmodels.com and we'll be happy to send you replacement parts at no extra cost. Have a question, or something is wrong with your model? Check out the Ugears Fan Club Facebook page for helpful tips and suggestions from our international Ugears family, or simply email us with your question. We are proud to be known for our excellent customer service.

Caution. Not suitable for children under 36 months.

- Number of components: 460
- Construction time: 8 hrs
- Grade: High
- Model size: 31.6*13.8*11.8 cm
- Package size: 37.8*17*3.4 cm
