500907510 - Model kit, 1:14 material superstructure short f. ZGM

from **284,75 EUR**

Item no.: 370874
shipping weight: 0.20 kg
Manufacturer: Carson

Product Description

A timber transporter converted into a building materials transporter in next to no time. The basis of this platform body is a steel frame with integrated subframe for mounting on the TAMIYA Volvo FH16 chassis. The original mounting points/screw connections were used for the assembly. No holes need to be drilled manually. The detailed drop sides are provided with surface engravings on both sides and are movably mounted in sturdy hinges. The drop sides are "locked" by means of powerful neodymium magnets, two of which are almost invisibly embedded in the drop side. The wooden application included in the conversion kit emphasises the detailing of the plateau superstructure and can be aged and adapted according to your own wishes. This "short version" of the building material plateau enables the optional mounting of a loading crane on the mounting plate provided on the vehicle. Suitable ONLY for TAMIYA Volvo FH16 timber transporter

Details- Scale: 1:14- Age recommendation: from 14 years
Technical details- Base carrier/subframe made of steel (CNC milled)- CNC milled aluminium drop sides, with detailed surface engravings- Locking of the drop sides with neodymium magnets- All 4 drop sides are functional- 3 hinges per side drop side- Fixed rear drop side- Real wood floor application
Technical data- Length: 440 mm- Width: 195 mm- Height: 130 mm- Dropside height: 75 mm- Weight: 2000 g
