370410262 - 3.7V 300mAh LI-PO battery, RC, from 14 years of age

from **5,11 EUR**

Item no.: 363973
shipping weight: 0.10 kg
Manufacturer: Carrera

Product Description

New power for your quadcopter! It's time for a new battery! Whether your old device is defective or lost, or if you are simply looking for a second battery for a longer flight time: Here is the solution. The lithium polymer battery operates at 3.7 V. You should pay attention to this voltage when choosing the right charger. The milliampere hours (mAh) of the unit represent the amount of charge that can flow through the device in one hour. With this battery it is 300 mA. The disposal of your old battery is a particularly important issue. Look out for the yellow boxes in electrical or DIY stores. Never dispose of your used battery in normal household waste. The disposal centres provided by the local waste disposal companies also offer professional disposal. The battery is for your Powerforce quadcopter.

Details- Age recommendation: from 14 years Technical data- Voltage: 3.7 volts- Capacity: 300 mAh- Technology: lithium polymer compatible with- Powerforce drone / quadcopter (503098 and 503099) Content- 1 piece
