from **46,07 EUR**

Item no.: 363865
shipping weight: 0.20 kg
Manufacturer: Carrera

Product Description

Say goodbye to tangled cables! Carrera WIRELESS+ wireless technology makes it possible. The wireless 2.4 GHz WIRELESS+ hand controller provides more freedom of movement when dueling on the slot car racetrack. Its lightweight design is an advantage during wild chases, as your hands are not confronted with unnecessary weight, allowing you to concentrate fully on making the right moves to control the slot car. To ensure that up to 6 drivers can compete against each other within the same environment without interference, the radio transmission is frequency-independent thanks to frequency hopping via 2.4 GHz. The range of the controllers of up to 15 metres is also impressive. Whether you are at a short distance from the race track or your track is so big that you lose sight of your speedster during the race in loops or steep bends - the connection remains stable. Every Carrera fan knows how quickly time flies when you're competing in exciting races. In continuous operation, the battery therefore lasts for up to 8 hours of playtime. In addition to the 2.4 GHz WIRELESS+ speed controller, this product also includes a replacement button, the lithium polymer battery and operating instructions.

Details- Age recommendation: from 8 years
Technical details- DIGITAL 132- DIGITAL 124- For wireless driving fun- 2.4 GHz WIRELESS+ radio technology- Rechargeable battery
Technical data- Range: max. 15m- Rechargeable battery- Rechargeable battery for max. 8 hours
Contents- Wireless 2.4 GHz WIRELESS+ hand controller- Replacement button- Lithium polymer battery- Operating instructions
