20020575 - CARRERA DIGITAL 124 Steep curves 2/30o (6)

from **62,66 EUR**

Item no.: 364866
shipping weight: 0.10 kg
Manufacturer: Carrera

Product Description

In this section of the track, the slot cars lean steeply into the bend! The advantage of these bends is that you can drive through them at high speed without skidding off the track. The gradient makes all the difference here. The track section is supported by the supports included in the set. The steep curve consists of six track sections, each with an angle of 30°. When assembled, they form a 180° curve that has to be negotiated. The scale of the track is 1:24, making it suitable for all racetracks of the same scale. Whether Carrera DIGITAL 124, Carrera DIGITAL 132 or the Carrera EVOLUTION track, with this steep curve you can bring action to every race.

Details- Scale 1:24- Age recommendation: from 8 years- For 4-lane assemblyCompatible with- DIGITAL 124 - DIGITAL 132 - EVOLUTION Contents- 6 track sections each 30 degrees (6 pieces = 180 degrees) - Supports
