from **26,58 EUR**

Item no.: 364880  
shipping weight: 0.90 kg  
Manufacturer: Carrera

### Product Description

Inside edge strips complete your race track. The clear advantage of outside edge strips on 1:24 race tracks is easy to understand. They are there to prevent the large 1:24 scale slot cars from sliding off the track when drifting round bends. However, if the visually appealing appearance of your racetrack is also important to you, you should not do without the inner edge strips. They complete the track visually, but also functionally, as the slot cars without them hop over the edge of the track when driving very slowly. A very unattractive driving experience. The set contains a total of 12 inner edge strips - also known as curbs - for the 4/15° bend. Two end pieces are also included, which are attached to the adjoining straight. They are on a scale of 1:24 and can therefore be used for race tracks on the same scale.

Details- Scale 1:24- Age recommendation: from 8 years Compatible with- DIGITAL 124 - DIGITAL 132 - EVOLUTION Contents- 12 pieces- 2 end pieces
