20020584 - CARRERA DIGITAL 124 Additional power supply 5 m

from **19,16 EUR**

Item no.: 364872
shipping weight: 0.20 kg
Manufacturer: Carrera

Product Description

More power for longer racetracks There are various reasons why your Carrera track needs an additional power supply. After a certain length, the current from the connection point is no longer sufficient to supply the entire track with enough power. The slot cars slow down or stop. Even if several vehicles are travelling on a track at the same time or several points are used along the course of the track, the racetrack has an increased power requirement. To counteract this, you can help with this 5 metre long cable. Install it as a cable between the connection point and another track to supply your entire racetrack with sufficient power.

Details- Scale 1:24- Age recommendation: from 8 years Technical details- For increased power requirements- Suitable for DIGITAL 124 - Suitable for DIGITAL 132 - Suitable for Carrera EVOLUTION track Technical data- Length: 5,000 mm Contents- Additional power supply 5m
