Product Description

Since its introduction in 1979, the Leopard 2 main battle tank, not infrequently called the best in the world, has been modernised and adapted again and again. The most recent version, the Leopard 2A6M, has a longer on-board gun (L55) and improved mine protection. Besides Germany, another 15 nations use the Leopard 2, including Canada in Afghanistan. The model offers the choice between the A6 and A6M (additional mine protection plate). The surface textures include all details, including the filigree anti-slip coating. As a special feature, the model has a two-piece chain that is bent. This provides an even more authentic appearance.

- Optionally A6 or A6M
- Finely detailed surface structures with anti-slip coating
- Two-part chain; is bent; even more authentic
- Actual fog medium throwing system (6+2)
- Rotatable turret
- Height-adjustable cannon
- Tower hatches can be displayed open
