from **20,83 EUR**

Item no.: 364853  
shipping weight: 0.60 kg  
Manufacturer: Carrera

### Product Description

Drifting needs to be learnt. But unfortunately, all your skills won't help if you slip out of the bend because the track is too narrow when drifting. To prevent this from happening again in future, you can now extend your race track in a sensible way. This set contains three outer edge strips for the 1/60° bends. Two end pieces are also included, which can be attached to the start and end straights of the bend and provide an attractive finish to the curbs. On a scale of 1:24, the end pieces can be installed on race tracks of the same scale: Carrera DIGITAL 124, Carrera DIGITAL 132 and Carrera EVOLUTION. From now on, you no longer have to hold back when drifting round bends. Give it your best shot and one thing above all: full throttle!

Details- Age recommendation: From 8 years- Scale: 1:24Technical details- Suitable for Carrera Evolution- Suitable for Carrera Digital 132- Suitable for Carrera Digital 124- Edge pieces for the race trackContents- 3 outer edge strips for curve 1/60° - 2 end pieces
