Product Description

Dive down and discover the breathtaking underwater world of Aqua. Grow colourful corals, place them cleverly and attract small and large sea creatures. Aqua is just as diverse as the coral reefs you create and offers plenty of variety for the whole family! In Aqua: Colourful Underwater Worlds, you grow corals and create habitats and reefs for a variety of small sea creatures by skilfully selecting and placing tiles. The more different small animals you have, the more likely you are to attract large sea creatures such as manta rays, blacktip reef sharks and dolphins. After a total of 17 rounds, the winner is the player who collects the most points with their corals and sea creatures.
