

Revell model making paint based on synthetic resin, car paint set (6x14ml enamel colours)

Product Description

Revell Colour is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted with the 14 ml paint can, which is popular with many hobbyists. All colours - except signal colour - can be mixed with each other and can be diluted with Revell Color Mix. This means that the paint can be applied not only with a brush but also with a spray gun. Revell Painta Clean is used as a cleaning agent for the brushes and Revell Airbrush Clean for the spray gun. Details- 6x14ml Special features- car paint set - synthetic resin enamel paint- for brush and spray gunScope of delivery- 6 x 14 ml paint cans
