Product Description

The legendary FIAT 500 was produced in Italy for two whole decades from 1957. In 1965, the Abarth company, which specialised in improving and equipping FIAT vehicles with sporty features, modified the popular 500 and launched the Abarth 595 version on the market. The modification significantly improved the performance and appearance of the vehicle. The 1:35 scale model, which is made of 100% COBI bricks, faithfully reflects the characteristic shapes of the legendary Fiat Abarth 595. We have not used any stickers on this model. They have been replaced by durable decals that do not wear off even with intensive play. Rotating wheels fitted with tyres are perfect for moving the model during play. Once assembled, the model is 9 cm long. The set includes a sign with the name of the car. A car made of COBI building bricks is not only a toy, but also a collector's model that will be of interest to car and building enthusiasts of all ages! Complete the extensive collection of licensed COBI cars in 1:35 scale with another example that is important to the history of the automotive industry. Build history, brick by brick!
