20030364 - DIGITAL 132 Track change curve right, inside to outside

from **51,68 EUR**

Item no.: 362949
shipping weight: 0.80 kg
Manufacturer: Carrera

Product Description

Extension lane change curve for the digital Carrera tracks on a scale of 1:24. With this extension set, you can give your race an extra kick. With the lane change curve, the slot cars can switch to the other lane and continue their race there. If you then manage to put your car in front of your opponent's car, you have the advantage for the time being because he can no longer pass you. But watch out! Changing lanes can always lead to a crash. Choose the right time and give yourself an advantage in the battle for the title. The lane change curve consists of two track sections and is suitable for the Carrera DIGITAL 124 and Carrera DIGITAL 132 digital racetracks or the digitally retrofitted Carrera EVOLUTION on a scale of 1:24.
