shipping weight: 0.50 kg
Manufacturer: ROKR

Product Description

ROKR Parachute Tower EA01 is a DIY music box 3D wooden puzzle kit from the Magic Amusement Park series. The designer takes the classic parachute tower ride in the real amusement park as the design prototype and modifies it so that the parachute goes up and down in a staggered manner with mutual lifting, which is more creative and entertaining. The overall style borrows from the European retro style, and the ceiling takes the shape of the six mangoes. The six mangoes at the end symbolise protection and blessing. The hexagonal base echoes the shape of the ceiling and the classic curtain-style side windows are made of translucent materials that let in warm light, creating an all-encompassing atmosphere. There are three lights in total, namely the constant light of the roof, the centre column and the flowing light inside the base. The internal drive shaft is cleverly used to achieve the back and forth movement of the vertical parachute lift. The "Falling Flower" music plays automatically when running and the light effect is integrated with the background music, so players can enjoy a pleasant time with the melody as if they are entering a realistic amusement park. Notes: Due to customs regulations, wax and battery (AAA*3) may not be included in the package. Wax: You can use normal candles, crayons, beeswax, etc.

Details- Assembly time: 5.5 hours- Difficulty level: 4- Number of parts: 184 Technical data- Material: wood- Depth: 14 cm- Width: 14 cm- Height: 30 cm
