370501032 - RC 2.4GHz Super Mario(TM) Flying Cape Mario

from **32,05 EUR**

Item no.: 363947
shipping weight: 0.40 kg
Manufacturer: Carrera

Product Description

Flying high with Mario Super Mario™ brought out his cape for the first time in the classic video game Super Mario World™. With his yellow cape, Mario can not only glide through the air for a long time, but also attack enemies by whirling his cape around. Now the popular plumber can take off in your home too! A special kind of excursion Mario flies through your child's room with rotors attached to his back. Thanks to his original Nintendo licence, the video game hero almost looks as if he has made his way directly to you from his last adventure. Thanks to the gyro system and coaxial rotor control, you are guaranteed stable flying fun. Mario can therefore also be controlled perfectly by small pilots. The controls are also infinitely variable and use 2.4 GHz radio technology. This makes it possible for up to 16 RC quadcopters and helicopters to fly through the air at the same time. Cape Mario is 10.4 cm tall and its rotors have a diameter of approx. 20.9 cm. He makes the skies unsafe for around 5 minutes, then the pot-bellied plumber needs a breather of approx. 30 minutes. The battery is then fully charged again and it can continue its exploration tour. When the RC helicopter arrives, it's straight up into the air. Because with Mario, a controller, a charging base, batteries, the rechargeable battery and a USB charging cable for mobile charging, you have everything you need for your first trip.

Details- Age recommendation: from 8 years- Difficulty: Level 1- Drone class: 0- Super Mario™ with Nintendo licence Special features- Ready to run Technical data- 2.4 GHz technology- Digital Proportional- USB- Rotor diameter- Running time: 5 min- Charging time: 30 min- Rechargeable battery- Length: 10.4 cm - Width: 20.9 cm- Height: 19.4 cm Contents- 2.4GHz Super Mario™ - Flying Cape Mario- 2.4 GHz Controller Flying Mario/Yoshi (DH) for 501033- USB charging cable for helicopters 501027, 501003, 501010, 501005, 500001, 500002, 500003- AAA ALKALINE BATTERIES - 8 pcs.
