Product Description

Rolife Alice's Tea Store DG156 is a DIY miniature house in vintage style from the Mystic Archives series. We all know the story of Alice in Wonderland. The designer extracted the most recognizable elements of the Wonderland world: Mr Rabbit, crows, pocket watches and chessboard tiles to create a rich European style, but girly, afternoon tea scene. The product also includes details such as exquisite china, desserts, magic brooms and other decorations to make the picture richer and more interesting. Gather your friends and family and let's build this fantastic dollhouse kit! Scene with a story: This miniature house focuses heavily on "story", "scenario" and "atmosphere" when choosing the theme and style: whether you focus on the overall picture or a detail, you can immediately get involved in the story. Ambient light set: Each product has 1. warm and bright LED lights; 2. hidden battery box (you need to prepare two 7 batteries yourself). Easy assembly (no painting required): All miniature house kits in this series come with colours and require no additional painting. In addition, the proportion of prefabricated parts has been increased in this series compared to the previous products, which makes the assembly process easier and more convenient. Can be combined with figure dolls: This miniature house also creates a great story atmosphere and enhances the collecting experience if you combine it with 7-9 cm tall figure dolls of your choice (especially Rolife figure dolls).
