Item no.: 363919
shipping weight: 0.80 kg
Manufacturer: Carrera

Product Description

A plumber travelling the world! In Super Mario™ Odyssey, Mario leaves the Mushroom Kingdom and sets off on new adventures. The aim is to prevent his arch-enemy Bowser from marrying Princess Peach™. Cappy, a hat spirit, is always at Mario's side on his adventures and helps him with all kinds of challenges. In Cityland, Mario is also travelling on a Vespa-like moped. Now the video game hero can ride his scooter right into your child's room! Experience all kinds of adventures together with Mario! With the Nintendo licence, every last detail has been thought of in the 1:20 scale remote-controlled vehicle. The squeaky yellow scooter is equipped with front and brake lights, making it a real eye-catcher on night-time outings. With a top speed of up to 9 km/h, it whizzes through the children's room for up to 35 minutes. The scooter is 20 cm long and is ready for immediate use thanks to the Ready to Run concept. Thanks to 2.4 GHz technology, the Carrera RC vehicle can be controlled independently of frequency and without interference. For example, you can let Mario race against his friends on their RC vehicles. Who will win the race? Details - Remote-controlled scooter with Super Mario™ - On-road - With front and rear lights - Scale: 1:20 - From 6 years of age
