Product Description

The officially licensed 1:18 scale remote-controlled Sonic vehicle from Carrera RC brings the legendary blue cult hedgehog from the popular video games directly to your home. The LED light attracts special attention during exciting night races and the child-friendly controls enable even the youngest Sonic fans aged 6 and over to master the racetracks. With a top speed of up to 9 km/h, this model offers a thrilling driving experience. The robust body made of special plastic ensures durability, while the full-suspension chassis and pneumatic tyres enable outstanding performance. With the rechargeable high-tech LiFePo battery, the vehicle offers a long running time of up to 20 minutes. Surprise your children, Sonic fans and gamers with this fantastic gift.
