20089823 - Rechargeable battery for wireless hand controller

from **9,87 EUR**

Item no.: 363009
shipping weight: 0.10 kg
Manufacturer: Carrera

Product Description

The official spare part for the WIRELESS+ hand controller. With this replacement battery, you can get your WIRELESS+ hand controller up and running again. The LiPo battery is designed exclusively for the Carrera WIRELESS+ handheld controller, which is used with the Carrera Digital 124, Carrera Digital 132, Carrera Digital 143 and Carrera EVOLUTION racetracks. Should it become necessary to replace the old battery, this product provides you with a powerful power storage unit for your 2.4 GHz controller, which, when fully charged, ensures a playing time of up to eight hours in continuous operation. Gentle handling for the lithium polymer battery. To achieve a long service life for the LiPo battery, you should charge it regularly. Completely discharging the battery by using the WIRELESS+ hand controller for too long should be avoided. To replace the battery, simply unscrew the battery compartment of the controller and disconnect the old battery from the plug connection. Then connect the new battery to the connection socket and you are ready to go again.
