from **13,18 EUR**

Item no.: 364000
shipping weight: 0.10 kg
Manufacturer: Carrera

Product Description

New power for your RC model! After a certain number of charging cycles, the old battery simply needs to be replaced so that the vehicle can be used at full power again. This lithium-ion battery operates at 7.4 V. When choosing the right charger, you should always bear this voltage in mind. The unit milliampere hours (mAh) represents the amount of charge that can flow through the device and the conductor within one hour. In the case of this rechargeable battery, this is 1200 mA. You should not dispose of your old or broken Li-ion battery in your household waste, but in yellow boxes specially set up for this purpose. You can find these in electrical or DIY stores. The disposal centres of local waste management companies also offer professional disposal. New energy for your device! - Replacement battery for your remote-controlled vehicle- Li-Io battery 7.4 V 1200 mAh- Package contents: 1 piece- 14 years and older
