from **10,40 EUR**

Item no.: 364008
shipping weight: 0.10 kg
Manufacturer: Carrera

Product Description

Give your RC model new power with this battery! Is the power of your vehicle gradually diminishing? Then maybe it's time for a new battery. This lithium-ion battery works with 7.4 V. You should pay attention to the voltage when choosing the right charger. The unit milliampere hours (mAh) represents the amount of charge that flows through the device and the conductor within one hour. For this battery, this is 900 mAh. Old Li-ion batteries should generally not be disposed of with household waste, but in the yellow boxes provided for this purpose in specialist shops, such as electrical or DIY stores, or at local waste disposal centres. Give your device new power with this battery.- Replacement battery for your RC model- Li-Io battery 7.4 V 900 mAh- Package contents: 1 piece
