Product Description

Lucky in the game, unlucky in love? You can have it all at Lifestyle. But first you have to make some real decisions. Do you prefer collecting houses, cars or are you more of an animal lover? Which profession would you like to pursue? Is love a risk you want to take? Choose wisely and nothing will stand in the way of your (dice) luck! A strategic game with a unique combination of dice and cards. How to play Lifestyle MBE3. At the start of the game, a display of 3x3 cards is formed. The player whose turn it is can take a single card from the display or all the cards in a column or all the cards in a row and place them in his or her score zone. If you have cards in your dice zone, you can either take more cards from the display or try to roll all the cards in your dice zone and place them in your score zone. To do this, they select a card from their dice zone and roll the number of dice shown to reach the specified number. If he succeeds, he chooses the next card. If he rolls all the cards from his dice zone in a single turn, he may place them in his scoring zone. If they make even one mistake, they are out of luck and their turn ends immediately. As a consolation, they receive a chip that they can use, for example, to reroll a die on their next attempt. If a player takes the last card from the display, 9 new cards are laid out. In this way, all 72 cards are played through. Cards in the scoring zone count for different numbers of points. Whoever has the most points at the end wins.
