Product Description

The Royal Monstrological Society is very exquisite. Each year, the society allows only one aspiring monstrologist to join the elite association. In order to be accepted into the circle of the most renowned monster experts in the entire empire for legends and lore, applicants must come up with the most impressive and magnificent menageries of monstrous creatures. Therefore, the vying candidates embark on voyages of discovery to magical lands and search for the most exotic animals. A small financial contribution from the company makes the adventure and the hiring of assistants possible. At the end of the fourth hunting season, the candidates finally present their collection. For this, the Royal Monstrological Society gathers for an annual banquet, better known as the Carnival of Monsters: Carnival of Monsters. In the draft card game Carnival of Monsters, country cards are collected in order to capture the most unusual and exotic monsters. In the end, the player with the most spectacular menagerie wins. To achieve victory, talented employees are hired and secret goals are pursued. You collect points by achieving these goals, earning gold crowns and, above all, returning safely with your monsters.
