Product Description

A red elephant? Clearly: "Strawberry!" It's logical, isn't it? Because the colours of the cards indicate which term is called out when the card is placed. Players win cards with speed if they have the same motifs and the chatterbox creates a lot of confusion. A fun reaction game that will put players' concentration to the test. Schnattergei is the latest card game from the think tank of Halli Galli inventor Haim Shafir.
