Product Description

Hum hum hum - but where are the real honey pots hiding? Can you find the bees in their hives? Don't be too sure, because they keep changing their places. Whoever collects the most honey at the end wins the game. Honeybees - a clever game for little memory artists! How to play Honeybees. The bees are hidden under the beehives and placed in the centre of the table. All the cards are shuffled and placed in a pile. The player draws a card. If it shows a coloured bee, they must lift the matching beehive. If the bee underneath is the right colour, the player may place the beehive with the hidden bee in front of them. If the card shows a beehive, he may take any one from the centre; if it shows a bear, he must return a beehive in front of him to the centre. The game ends when a player has four beehives in front of him. Otherwise, the game ends when the pile of cards has been used up. The player with the most beehives in front of them wins.
