### Product Description

For transporting your Titan Legions safely and comfortably. The Feldherr backpack for Adeptus Titanicus is filled to the brim with customised foam and is definitely the most comfortable way to take your Titan Legions to the battlefield. Whether you're on the bus or the underground, you'll always have your exclusive collection with you. The fine-pored Feldherr foam naturally offers comprehensive protection against damage. The fragile parts of your unusual models remain intact and sensitive surfaces are protected from scratches and abrasion. **HSMEFQ110BO**: This foam mat has a large customised compartment in which a Warlord Battle Titan can be stored horizontally. This ensures that the volcano turrets and Apocalypse missile launchers are ready for use in the future. There are also three compartments under the large titan for three Questoris Knights miniatures. **HSMEFN090BO**: The foam insert has two large, custom-fit compartments in which you can place a Reaver Battle Titan. Energy Fist, Gatling Blaster and Apocalypse Rocket Launcher are perfectly protected. **HSMEHK085BO**: The insert has four compartments for four horizontal Warhound Titan models. Plasma guns, volcano megabolters or inferno guns are safe here. **HSMECO075BO**: With this foam insert you can safely store up to six medium-sized miniatures of your Titan Legion. The six equally sized compartments are ideal for the Acastus Knights Porphyron models. Each of the 6 compartments is 73 mm long x 80 mm wide x 65 mm deep. **HS0501012BO**: This foam tray provides a safe place for up to twelve Questoris Knights of the Adeptus Titanicus. Each of the 12 compartments is 54 mm long x 41 mm wide x 40 mm deep. The backpack is made of lightweight but durable materials and features breathable mesh padding. To make loading and unloading easier, the zip opens on three sides and the backpack can be opened almost completely. The base and back section are reinforced with PVC inserts for additional protection. The set is completed by the matching foam lid. You place this on the top foam insert so that nothing falls out during transport.
