from **50,59 EUR**

Item no.: 358752
shipping weight: 1.40 kg
Manufacturer: COBI

Product Description

The model of the mighty Jagdpanther fighter tank was developed in large scale 1:28 from 950 elements and measures a full 34 cm in length. The size of the model made it possible to design parts of the vehicle's interior. The model provides access to the service hatch, under which is a removable engine. Additional functionalities are: Gun cannon that can also be moved sideways, access to hatches for the crew, working chain traction. The model uses high quality, durable prints. The set includes a figure of a tank commander, which also includes prints on the back. The set is rounded off with a white stone with the vehicle name printed on it. Such a huge model provides many hours of exciting construction and will become a dominant exhibit in your collection! Build history, brick by brick!

Jagdpanzer V "Jagdpanther" is the best German fighter tank of the Second World War. It was designed on the chassis of the famous Panther tank. This huge vehicle was equipped with an effective and battle-tested 88 mm gun. The destroyer was characterised by very good armour and manoeuvrability. Production of the Jagdpanther began in December 1943, and by the end of the war some 392 examples of this vehicle had been produced. Jagdpanthers were first used in Normandy, also fought in the Ardennes and in Germany. They appeared on the Eastern Front in autumn 1944 and fought successfully against Soviet IS-2 tanks! The vehicle is still very popular today and often appears not only in literature but also in games, films and video footage and always arouses interest and emotion!

Not suitable for children under 36 months. Legal minimum age: 9
