Product Description

4D Glasses Turboshift Acrylic Paint 20ml Bottle

4D Glasses was originally a limited edition colour for LVO, but it was so popular that we had to reintroduce it permanently. The name is a reference to the fact that the colour of 4D Glasses is similar to that of 3D Glasses, but even brighter and more saturated! This pigment appears white in the bottle and it is recommended that this colour is used over a black primer. You can layer it over other colours and it will get lighter the more layers you apply.

Turboshift paints are made with tiny glass-like flakes that act like millions of tiny prisms in the paint. Depending on how the flakes are made, different colours will be refracted or reflected in the light. In layman's terms, this means that the paint changes colour depending on the light under which you look at it and the angle at which you hold it to that light. The paint was developed for use with the airbrush, but can also be applied by hand.

Caution. Not suitable for children under 36 months.

- Size: 20 ml
- Colour: 4D Glasses
