from **7,07 EUR**

Item no.: 346991  
shipping weight: 0.10 kg  
Manufacturer: Turbo Dork

### Product Description

#### Ice to Never Turboshift Acrylic Paint 20ml Bottle

I slept in a flame because it made me feel strong, and built up my ice to never thaw. Ice to neVERRrrr. Ice till neVERRrrr. Was originally introduced as the middle colour of the Chill Out set. Ice to Never can be used alone or in combination with Crystal Cavern or Wavelength. Ice to Never is blue in the bottle but turns from blue to pink to purple with use. Our example images for Ice to Never are taken over a black base coat.

Turboshift paints are made with tiny glass-like flakes that act like millions of tiny prisms in the paint. Depending on the nature of the flakes, different colours are refracted or reflected in the light. In layman's terms, this means that the paint changes colour depending on the light under which you look at it and the angle at which you hold it to that light.

The paint was developed for use with the airbrush, but can also be applied by hand.

Caution. Not suitable for children under 36 months.

- Size: 20 ml
- Colour: Ice to Never
