from **12,51 EUR**

Item no.: 352353
shipping weight: 1.10 kg
Manufacturer: Clementoni

Product Description

Clementoni Glitter-Flummis, experimental kit, from 8 years (DE edition).

A mini science lab where children can discover the "magic" of chemistry and make fabulously colourful and glittery balls that really bounce! The kit includes coloured powder and everything children need to create wonderful fun flummies that sparkle!

The manual, which explains all the stages of the experiments, guides children in simple and understandable language. The balls are safe and completely non-toxic, so children can play and experiment with the balls in complete safety.

Caution. Not suitable for children under 36 months!

- Recommended age: from 8 years
- Number of players: from 1 player
