Product Description

Clementoni Organic Greenhouse (Play for Future), experimental kit, from 8 years (DE edition).

A brand new greenhouse with a modern design to discover the secrets of organic farming! Made entirely from recycled plastic, with biodegradable jars and organic seeds and a new simple and effective opening system to ensure the right habitat for small seedlings.

With a complete set of tools and special hanging pots for germination to help the child plant and grow plants! The science manual helps the child discover the secrets of organic growing - to become a botanical super expert!

Play for Future products are designed to teach children the value of sustainability and the importance of respecting the environment through play.

Caution. Not suitable for children under 36 months!

- Recommended age: from 8 years
- Number of players: from 1 player
