Product Description

Clementoni Glow-in-the-Dark Volcano, experimental kit, from 8 years (DE edition).

A fantastic volcano that can be customised to create spectacular glow-in-the-dark eruptions! The set contains: Plaster and a mould for forming the volcano, tempera paint for painting, baking soda, a UV torch and neon pigments to create incredible eruptions! One of the most famous science experiments is now even more exciting thanks to the fluo effect of the lava! The scientific instructions accompany the child through the various experiments, which can be carried out in complete safety.

A set that allows children to discover the world of science in a simple and fun way.

Caution! Not suitable for children under 36 months!

- Recommended age: from 8 years
- Number of players: from 1 player
