59122 - RoboMaker Starter, experimental kit, from 8 years (DE edition)

from **54,67 EUR**

Item no.: 352332
shipping weight: 1.40 kg
Manufacturer: Clementoni

Product Description

Clementoni RoboMaker Starter, experimental kit, from 8 years (DE edition).

An incredible lab to discover the secrets of robotics and coding through block programming.

Build 3 robots from more than 200 components, 2 motors, 1 speaker and 1 IR sensor, and programme them to perform fun activities, helping to develop computational thinking. Program the X1 Drawer to create fantastic designs, play with the X2 Elevator to pick up objects or push them off the table with the X3 Analyser! By using the instruction manual, you will become a programming expert, able to build any other kind of robot and program it to do anything you want.

Caution! Not suitable for children under 36 months!

- Recommended age: from 8 years
- Number of players: from 1 player
