Item no.: 352351  
shipping weight: 2.00 kg  
Manufacturer: Clementoni

### Product Description

Clementoni Secrets of Chemistry, experimental kit, from 9 years (DE edition).

Science is even more fun with this special set that is half science and half mystery! Like real investigators, children get involved in an adventure and have to solve puzzling situations and find clues.

The set contains everything needed to carry out experiments: Litmus paper, mixtures and filters. Included in the set are a small funnel, filter paper, a spatula and much more. And you can even use the magical cardboard "decoding wheel" to decipher the clues. With this game, children sharpen their minds and are introduced to the principles of chemistry in a simple, fun and highly engaging way!

- Experiment set for discovering chemistry
- incl. test tubes, pipettes, filters, funnels, decoding wheel, etc
- promotes scientific interest & sharpens the mind
- with illustrated instructions

Attention! Not suitable for children under 36 months!

- Recommended age: from 9 years
- Number of players: from 1 player
