Product Description

Clementoni Wonders of Chemistry, experimental kit, from 8 years (DE edition).

A set for amazing chemistry experiments! A laboratory for budding scientists to carry out over 180 experiments and discover the secrets of chemistry in complete safety. The set contains many substances to experiment with amazing chemical reactions and create incredible effects!

All experiments are described using pictures with clear and detailed explanations and are summarised in an instruction manual that makes chemistry a fun game.

Caution! Not suitable for children under 36 months!

- Recommended age: from 8 years
- Number of players: from 1 player
