 shipping weight: 1.00 kg
 Manufacturer: Clementoni

Product Description

Clementoni Discover the world of veterinary medicine, experimental kit, from 5 years (DE edition).

For all children who dream of becoming a vet, this great set will help them discover this fascinating profession! The game includes a stuffed animal to take care of and everything needed to do so: a stethoscope, bandages, gauze bandages and a special collar. In the process, the youngest ones can slip into the role of a real doctor and learn a lot about animals with a sensitive and entertaining play experience.

The accompanying booklet guides the child as they play and provides lots of useful information about the characteristics of animals and the job of a vet. A video tutorial with a funny vet guiding children through all the suggested activities adds to the fun.

Caution. Not suitable for children under 36 months!

- Recommended age: from 5 years
- Number of players: from 1 player
