Product Description

Clementoni Nature under the microscope experimental kit, from 8 years (DE edition).

Galileo - Science & Play. Clear and simple answers to many fascinating questions. An interesting play programme for boys and girls. For all bright children with a thirst for knowledge. For understanding, experiencing and observing our environment. Here, the cause and effect of phenomena are explained scientifically. A fantastic, microbiological laboratory, rich in instruments and equipment to explore the microcosm surrounding us with the help of the precision microscope.

Caution. Not suitable for children under 36 months!

Note: 2 x AA Mignon LR06 batteries are required. These are not included in the scope of delivery!
