Product Description

Even in the second edition, the safest way to transport your undead is with the matching Feldherr foam set for the original game box. The zombie calypse enters its second round. Think about where and with whom you barricade yourself in. Because zombies have time - they are already dead and their only purpose in life is to wait until their prey becomes careless or insane. The second edition of Zombicide comes with 88 miniatures and countless game materials. To ensure that your game box doesn't end up in an apocalyptic state, we have this matching Feldherr foam set for your board game box. To ensure that your zombies' limbs only fall off in the game world and your miniatures remain unharmed, each figure, whether disgusting Fatty or sword-wielding Lou, gets a suitable compartment. The soft foam ensures that sensitive parts, such as Amy's sword or the scrawny arms of your undead, are optimally protected from damage. The colours of your painted models are also protected from scratches and ugly paint abrasion. The second insert offers you space for the figures and your game material. The compartments provide space for your tokens, dice, trackers and Survivor Colour Bases to be clearly sorted. You can store your dashboards in the large compartment. Place the ID cards in the recess in the top dashboard. There are two card compartments for your 107 cards. These have finger-wide recesses to make it easier for you to remove the stacks. All cards also fit with a sleeve. The foam cover supplied completes the set. Place this on top. This ensures that all miniatures and your game material are safely packed in soft foam and reliably protected. The double-sided tiles, car tokens and the Rule & Missions Book are stored separately under the foam inserts.
