AT09SET - Foam set for Adeptus Titanicus: Grandmaster Edition

from **30,56 EUR**

Item no.: 379512
shipping weight: 0.10 kg
Manufacturer: Feldherr

Product Description

Store Warlord Titans, Questoris Knights, building components and all accessories neatly and safely in the original game box. It is the Age of Darkness. The Emperor's dream lies buried beneath the ruins of the Great Brothers' War. Gigantic god machines clash and lay entire planets in ruins. Decide which side you want to fight on - loyalists or traitors - and lead your Titan legion into battle. The Grandmaster Edition is an equally gigantic bundle, with all the new releases of the Adeptus Titanicus. To keep everything safe and tidy in the box, we have the matching foam set for you here. - The set was designed to fit the original board game box of the Adeptus Titanicus Grand Master Edition. - The lid of the box protrudes approx. 1 cm. The foam set consists of: - 1 foam insert for 2 Warlord Titans (CHMEGV110BO) - 1 foam insert for building components and accessories (CJMEGT045BO) - 1 foam insert for Questoris Knights and building components (CJMEGU060BO) - 1 matching foam lid. Three foam inserts protect your miniatures and keep the Titans box organised. One of the inserts houses the two Warlord Titans. These are separated from each other in 2 customised compartments. This ensures that the miniatures do not slide around or bump into each other during transport. Painstakingly painted models are thus spared scratches and chipped paint. Next to this are two mats designed for the game material, the Questoris Knights and the building components. There are also suitable compartments for your 6 individually designed Imperial Knights of the Questoris class on the lower insert. This means that the thermal cannon, reaper chainsword and machine gun are protected from damage and ready for use in the next battle. You can store the building parts in the other seven compartments. The upper insert is also equipped with compartments for building parts. The miniature-accurate layout makes sorting easy. The hexagonal compartments hold the 6 playing field elements. A large rectangular compartment is used to store the bow templates, while the smaller one next to it is used to store the dice. There are two compartments of different sizes for the cards - a small one for the Titan weapon cards and a large one for the mission and combat option cards. They all have finger-wide cut-outs for easier removal and are of course also suitable for cards with sleeves. The clearly organised storage of the game materials means you can keep track of everything at all times and save time when setting up the game. The foam lid completes the all-round supply of the Grandmaster Edition. This means that the box can be turned upside down without anything falling out or hitting the cardboard lid. The rulebook, reference sheets, command terminals as well as the area ruler and the explosion and flame templates can be stored on the foam lid. All miniatures are safely stored, the game accessories are neatly stowed away and the contents of your box remain intact even on the bumpiest of journeys to the next battle. The foam inserts have the following dimensions: - CHMEGV110BO: 285 mm x 175 mm x 110 mm total height (100 mm usable height + 10 mm foam base). - CJMEGU060BO: 285 mm x 250 mm x 60 mm total height (50 mm usable height + 10 mm foam base). - CJMEGT045BO: 285 mm x 250 mm x 45 mm total height (35 mm usable height + 10 mm foam base). - high-quality, fine-pored foam - chlorine-free and acid-free - Made in Germany
