from **37,76 EUR**

Item no.: 379507  
 shipping weight: 0.40 kg  
 Manufacturer: Feldherr

### Product Description

For safe storage of the miniatures and all the accessories from the base game and the Crono expansion in the original game boxes. Use your powers and the spells provided by the Grimoire to make your way through the Lodge of the Black Rose. In the end, only one will be rewarded with the title of Grand Master and the power of the Artifact of the Black Rose. A gripping game with wonderfully detailed miniatures. And because there is unfortunately no protective spell for these, we have the foam set for the "Black Rose Wars" board game box here. And so that you can also keep the legendary guardian well protected, a customised foam insert for the Crono expansion - suitable for the original game box - is also included. - The foam inserts for the basic game fit exactly into the original board game box of the "Black Rose Wars" basic game from Ludus Magnus Studio. - The inserts offer space for all 34 miniatures and the complete game accessories of the basic box. - The lid of the board game box protrudes approx. 1 cm. - The foam insert for the Crono expansion fits exactly into the original board game box of the "Black Rose Wars" expansion "Crono" by Ludus Magnus Studio. - The inlay offers space for the miniatures of Crono and Medusa, as well as for the complete game accessories of the expansion. The set contains: - 1 foam inlay for miniatures, cards and tiles from the base game (AFMEMQ085BO) - 1 foam inlay for miniatures, tokens and rose pins from the base game (AFMEDY040BO) - 1 foam inlay for miniatures, cards and tokens of the basic game (AFEW050BO) - 1 foam insert for miniatures and accessories of the Crono expansion (AFMEMP100BO) - 2 foam covers The upper, 85 mm high insert for the basic game contains the large Evocations. The three Malacoda, as well as the Cerbero and the Bone Knights, have their own custom-fit compartments. This keeps the finely detailed miniatures safely in place while travelling. A hexagonal compartment in the centre is provided for the hexagonal tiles, two card compartments for the small cards (e.g. Evocation or Event Cards). The compartments have finger-wide cut-outs to make it easier to remove the stacks and are of course also suitable for cards with sleeves. The remaining Evocations miniatures are stored on the second mat. Here, too, each figure is completely surrounded by foam. This means that even the roughest transport cannot harm the delicate parts. If you paint your miniatures, you can also make sure that the colours are protected from scratches and abrasion. The tokens and rose pins are stored in the other compartments. The last insert for the base game materials houses your Mages in four miniature-sized compartments. Four large compartments offer enough space to neatly store all the large cards, such as the Spell Cards, even when sleeved. Tokens and small cards can also be organised here. A matching foam lid completes the all-round supply of your basic game box. The cover holds the larger cardboard components - the power and event boards, the Mage's Sheets, reference cards and the booklets. This ensures that all miniatures are securely packed, the game material is neatly stowed away and the contents of your box are optimally protected at all times. The foam insert for the Crono expansion is divided into 6 compartments. A large compartment, cut to the exact size of the miniature, houses the miniature of the Crono. Thanks to the precise cut, the figure remains in its softly padded place during transport. His weapon and other sensitive parts are perfectly protected from damage here. Medusa is also safely stored in the compartment next to it. If you paint your figures, you can be sure that they will be protected from chipping paint and scratches. There are a total of four compartments for the game material. Two of them are for the cards, one for the large cards and one for the small cards. The compartments are all equipped with finger-wide recesses for easier removal and are of course also suitable for cards with sleeves. The large compartment can be used to store the hexagons, the Crono sheet and the large card. One compartment remains in the centre for storing the tokens. Place the matching foam lid on top of the insert so that everything is completely packed in foam. The foam inserts have the following dimensions: - AFMEMQ085BO: 285 mm x 285 mm x 85 mm total height (75 mm usable height + 10 mm foam base). - AFMEDY040BO: 285 mm x 285 mm x 40 mm total height (30 mm usable height + 10 mm foam base). - AFEW050BO: 285 mm x 285 mm x 50 mm total height (40 mm usable height + 10 mm foam base). - AFMEMP100BO: 285 mm x 285 mm x 100 mm total height (90 mm usable height + 10 mm foam base) - high-quality, fine-pored foam - chlorine-free and acid-free - Made in Germany
