Product Description

The Tang dynasty is considered the golden age of Chinese garden design. Sit back, let life itself inspire you like Emperor Xuanzong and create living, natural works of art. Not much good can come from an untidy box. Even less from two untidy boxes. That's why we've created the Feldherr foam bundle to store all the game components from the "Tang Garden" Kickstarter campaign neatly and safely. The bundle comes with a foam set to fit the original board game box of the "Tang Garden" base game from ThunderGryph Games. As well as a second foam insert for the board game box of the Tang Garden expansion "Ghost Stories". Set number 1 offers space for all 12 character miniatures and the complete game accessories of the basic game. Includes plastic token and card holders for storing playing cards, tokens and tiles. Set number 2 for all character miniatures and the complete game accessories of the "Ghost Stories" and "Golden Age" expansions, as well as for the "Swan Decoration" add-on. All cards also fit with sleeves. All 12 character miniatures are perfectly stored in the foam insert for the Tang Garden base game and are each allocated a customised compartment. Customised compartments are also available for the pavilions, trees and other large decorations when assembled. The customised cut helps with sorting and also ensures that nothing slides around during transport. The sensitive parts and edges of the models are therefore optimally protected from damage. Once you have painted your miniatures, you can be sure that the colours will be spared abrasion and annoying scratches. You get 4 rectangular compartments for the Garden Tiles. The finger-wide recess makes it easier to remove them. This leaves 2 large and one small compartment for sorting tokens and the small landscape tiles. Once everything is in place, cover the whole thing with the foam lid supplied. Place the token and card holder, the large landscape tiles, player boards, the starting tile, the garden board and the rulebook on top. The token holder with its 8 compartments helps you to sort the decoration cards and character cards (both also with sleeves), the 12 cubes, character tokens, coins, small landscape tokens and the small decorations. It also serves to hold the game board in place. For complete all-round protection, we have packed a second foam cover into the basic game set. Set number two has 14 customised compartments reserved for the character miniatures from the "Ghost Stories" and "Golden Age" expansions. There is also a suitable compartment for the decoration when assembled. There are 2 compartments for the playing cards, one for the large cards and the other for the small cards. The finger-wide recess makes it easier to remove the cards. The remaining compartments are for the other accessories, such as the wooden tokens, landscapes, tiles and dice. Once everything is in its place, cover the whole thing with the foam lid provided. The two rulebooks are on top. All the miniatures and decorations are safely stowed away and all the game material is neatly stored. So you can sit back, relax and take care of the garden.
