from **25,14 EUR**

Item no.: 380069
shipping weight: 0.40 kg
Manufacturer: Feldherr

Product Description

All 44 miniatures and the entire game material safely stored in the original game box. Includes plastic inserts for sorting small game material. In an age of darkness, in a galaxy plagued by strife and terror, the Black Fortress is the last hope for a turning point in the war. So the brave and the desperate alike venture into the labyrinthine halls of this ancient space station in search of powerful technologies long thought lost. Blackstone Fortress is packed to the brim with wonderfully detailed miniatures and plenty of game material. To prevent your box from becoming a labyrinth itself and the figures from getting lost in the darkness, we have the matching foam set with matching plastic inserts for your game material. The set fits exactly into the original board game box from GamesWorkshop for "Warhammer Quest: Blackstone Fortress". Two matching Feldherr foam inserts guarantee optimum protection for your game pieces. A token holder and a plastic dice tray including an attachment take care of your small game components. The plastic trays fit perfectly into the compartments of the foam set. They can be removed individually and can also be used on the game table. The lid of the board game box protrudes approx. 1 cm. The set consists of: - 1 foam insert for miniatures (CMMEIO065BO) - 1 foam insert for miniatures and game material (CMMEIN040BO) - 1 plastic token holder with 1 compartment for wound markers. - 1 plastic dice holder with 2 tokens (CMMEIN040BO) - 1 plastic dice holder with 1 compartment for wound markers. 1 plastic dice holder with 2 compartments for the various game dice. - 1 plastic dice holder attachment with 5 compartments for game material such as inspiration, trap and inferno markers. - 2 foam lids Two foam inserts keep your box tidy, protected and organised. A 65 mm high insert is divided into 31 compartments that are individually tailored to the explorer and enemy miniatures. Wrapped in soft foam, the finely detailed figures are optimally protected from damage so that Amallyn Schattenspur can still aim her hunting rifle at the enemies in the future. You no longer need to worry about painted miniatures either. The inlay prevents them from sliding around or bumping into each other and thus ruining hours of painstaking painting. Colours remain intact and free from scratches. The second mat takes care of the well-being of the remaining 13 models. Rein's sniper rifle is as safe as Raus' climbing hook, and the claws of the Ur-Ghul remain dangerously sharp. There are 4 compartments for the playing cards. The large compartment for the exploration cards can also hold the encounter cards thanks to the additional cut-out. The compartments all have finger-wide recesses for easy removal of the stacks. Place the dice container in the large remaining compartment. Place the attachment on top and sort the various markers there. Place the token holder in the compartment with the small-format initiative cards. Finally, place a matching foam cover on each insert so that the miniatures are completely surrounded by foam. There is still enough space on the flatter mat for the game material to place the game board segments. You also place the explorer and enemy cards, the database and the hidden vault, the rulers and the booklets on the foam lids. This means that all 44 miniatures are safely stored, all the game material is neatly stowed away and the contents of your box are optimally protected, even on the bumpiest of journeys to the next expedition. - high-quality, fine-pored foam-chlorine-free and acid-free- Made in Germany As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted. - thermoplastic- no assembly required - ready to play- 3D printed in Germany
