## Vintage Car

from **10,91 EUR**

Item no.: 374906  
shipping weight: 0.20 kg  
Manufacturer: Rolife

### Product Description

With this 3D puzzle, Rolife takes you back to the time before the Second World War, when cars had spoked wheels instead of pneumatic tyres. This model of a two-seater car made of wood has the steering wheel on the "wrong" side and is probably modelled on the English Austin Mulliner from the pre-war period. You immediately fall in love with the vintage look of this wooden puzzle. Those mudguards, that nose and the spare wheel at the back, just too cute! There's a lot to see on this retro car in this children's craft set. The headlights in front of the radiator grille and the different shades of wood give the car extra panache. An 8-cylinder engine is hidden under the opening bonnet and the suicide doors can also be opened. Will you be tinkering with children and embarking on this adventure? Miniature car building kit Your building kit adventure begins with the packaging, in which you will find five wooden panels in four colours: light blue, white, natural and dark brown. You will also receive clear plastic for the windows and glue. The instructions for this craft kit are a large sheet printed on both sides with good pictures. We pre-cut the wood for the model kit using a special laser technique. Use tweezers or something similar to press the pieces of this adult model kit out of the wood. Most of the pieces in the car model kit have eyelets and holes. This allows you to press the puzzle pieces of this wooden model kit firmly together without glue. You can use the sandpaper supplied to refine the lugs for an even better fit. This 3D wooden puzzle is assembled 99% without glue. Model car, vintage-style home decoration Place the suitcase and guitar that no longer fit in the small two-seater on the roof rack. Finally, of course, you place the bonnet vignette with the R from Rolife on this 16 cm long kit. And with that you build the last of the 164 parts. We are sure that you will have enjoyed the crafting for adults.

Details- 3D Puzzle- 164 pieces- from 14 years- 16cm long
