 shipping weight: 0.50 kg  
 Manufacturer: Carrera

**Product Description**

The Mercedes AMG GT3 Evo is a modern classic of touring car racing. The Carrera EVOLUTION Mercedes-AMG GT3 Evo "Mercedes-AMG Team Winward M. Götz" is the current vehicle of the 2021 DTM champion Maximilian Götz. The champion also competed in the 2022 DTM season with the new vehicle and new team in the colours pink, white and blue, but was unable to match the high of the previous season. The Mercedes AMG GT3 Evo is also a real eye-catcher at home. With prototypical adjustments to the front, radiator grille and details at the rear, the new 1:32 scale model is more realistic than ever before. The headlights are also more than just decoration, as both the front and rear lights are fully functional and light up the racetrack at home. The Carrera car can also be converted to digital using a separate digital decode and offers unmistakable driving fun for young and old. Thanks to the advanced and beginner modes, the vehicle can be customised to suit personal driving skills.

Details- Scale: 1:32- Age recommendation: from 8 years Technical data- Front and rear lights- Original Mercedes licence Compatible with- EVOLUTIONS scope of delivery- Mercedes-AMG GT3 Evo "Mercedes-AMG Team Winward M. Götz, No.1"
