Product Description

A Super Star Destroyer model, up to 8 Imperial ships and the game material can be safely stored and transported in the storage box. At 19 kilometres long, the Super Star Destroyer of the Galactic Empire is 100 times larger than an Empire-class Star Destroyer. Equipped with 5000 turbolasers, a devastating number of other weapon systems and manned by over 1000 ships and several 100,000 crew, the term Super-Class is no exaggeration. With this impressive miniature, FFG brings the full Imperial might of the Star Destroyer to your gaming table. To ensure that it arrives there undamaged and in full splendour together with your fleet, we provide this storage box including the matching foam inserts. The large Feldherr foam insert offers optimum protection for this unique model with a compartment tailored precisely to the Super Star Destroyer. Surrounded by soft foam, the sensitive edges and other fine parts of the miniature are protected from damage. The colours are also optimally protected against scratches and abrasion. In addition to the star dreadnought of the Executor class, there is also space for 8 more ships from your Imperial fleet. You can also store command and thrust wheels in the two round compartments with finger-wide recesses. You can store even more game material on the four half-size inserts. The large ship cards and the ship markers of the Super Star Destroyer can be placed on the insert. The package is rounded off with the matching studded foam cover. Thanks to the self-adhesive backing, you can stick it to the inside of the hinged lid. This ensures that everything is securely packed in foam all round. With the robust Euro container from AUER Packaging made of impact-resistant and dimensionally stable plastic, your fleet is safely stored and transported. The lid, with its easy-to-operate hinge system and two locking levers, reliably protects the contents from dust and dirt. The box can be transported using the recessed grips on the sides.
