from **30,33 EUR**

Item no.: 380090  
shipping weight: 0.30 kg  
Manufacturer: Feldherr

### Product Description

The insert with foam inserts and token and tile organiser for your board game box. For neat and safe storage of miniatures and accessories. Hidden in the dark depths of Terrinoth, a power-mad Overlord gathers an army of horrific creatures around him. His goal: to subjugate the world of the living. A small group of brave heroes descend into the darkness to save the world from chaos and ruin. To prevent your heroes from sinking into chaos in the game box, you get this practical Feldherr organiser set for your board game box. The set fits exactly into the original board game box for the "Descent: The Journey into Darkness Second Edition" base game from FFG. Provides space for all miniatures and the complete game material from the base game. Two foam inserts ensure that all miniatures and the complete game material can be stored in the box. Two foam inserts protect the miniatures. Two plastic token holders help you sort the small game accessories. Another plastic insert forms the basis for storing the game board components. All cards also fit with sleeves. The rulebook and quest manual are stored on the foam lid. The lid of the board game box protrudes approx. 4 cm. The Flex Cross Band size L, which is also included in the set, provides more stability during storage and transport. The set includes: 1 foam insert for small miniatures and game material (AFET040BO)- 1 foam insert for large miniatures and game material (AFES070BO)- 2 plastic token holders, each with 4 compartments for small game material (60813)- 1 insert, made of plastic for game board pieces and feet (60811 + 60812)- 1 foam lid- 1 Flex Cross Band green - size L Each of the eight large monster figures has a safe place on the first foam insert. They can be stored both horizontally and vertically in compartments that are precisely tailored to them. The customised cut helps with sorting and also ensures that nothing slips around when travelling. The sensitive parts of the figures are therefore optimally protected from damage. If you have painted your models, you can be sure that the colours are still intact after transport. Two additional compartments are reserved for the small playing cards (e.g. condition and search cards). Of course, the cards also fit with protective sleeves. There is a large compartment in the centre that houses the two token holders. Each plastic insert has four compartments for sorting the small game material. Here you can store the tokens, doors and small game board pieces neatly and place them directly from the insert onto the gaming table. Foam insert number two has 31 compartments for the smaller miniatures. Your heroes are lined up here just as neatly as zombies, cave spiders or sarcomancers. There are also two compartments for the large cards, such as overlord and captain cards. These cards also fit with protective sleeves. There is still a compartment for the dice. Before placing the two foam inserts in the game box, place the cross-shaped plastic insert on the bottom of the board game box. Now sort the larger cardboard pieces - the game board pieces, the hero sheets and possibly the writing pad. You can use the four small compartments to store the plastic feet or other small parts. Once everything is in its place, put the two foam inserts in the box and cover them with the foam lid. Place the game instructions and the quest manual on top. All the miniatures are now safely stowed away and all the game material is neatly organised. You are now prepared for your journey into the depths of Terrinoth. The foam inserts have the following dimensions: AFET040BO: 285 mm x 285 mm x 40 mm total height (30 mm usable height + 10 mm foam base)- AFES070BO: 285 mm x 285 mm x 70 mm total height (60 mm usable height + 10 mm foam base)- high-quality, fine-pored foam- chlorine-free and acid-free- Made in Germany As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted. - thermoplastic- 3D printed in Germany
