from **8,53 EUR**

Item no.: 380094
shipping weight: 0.40 kg
Manufacturer: Feldherr

Product Description

Coloured bases for the production of individual shadowboards. Together with our anthracite-coloured grid foams, two-tone inlays can be produced very quickly and, above all, cost-effectively. The difference in colour means that missing parts can be quickly identified. They prevent the risk of loss or forgetting. You can see immediately whether everything important is in its place. Whether for the workplace in industry or for private use - shadowboards help to organise, tidy up and maintain an overview. There is no minimum quantity - we deliver from just one piece. The illustrations show an example of a possible application of an FS010 coloured foam shelf together with a 25 mm self-adhesive grid foam insert (the grid foams are available separately from us and are not included in the scope of delivery).

Technical data- Length: 35 cm- Width: 28 cm- Height: 1 cm
