Product Description

Transport all the contents of Resident Evil 3: The Board Game - Kickstarter Edition with this Feldherr foam set. Fits the original board game box. Death and chaos characterise the streets of Raccoon City. You are desperately looking for a way out of the city because you don't want to end up like the others. As a zombie in search of food. In the board game conversion of the video game, elaborately modelled undead and daring heroes await you. We can't prevent you from meeting a gruesome end, but with this Feldherr foam set, suitable for the board game box of the base game in the Kickstarter Edition, we can at least make sure that your miniatures and game material are kept safe and tidy. - The set fits into the original base game box of the "Resident Evil 3: The Board Game - Kickstarter Edition". - 3 foam inserts provide space for all plastic miniatures and for the entire game material of the Kickstarter Edition. - The plastic card holder helps you to sort your small-format playing cards. The cards also fit with protective sleeves. - The lid of the board game box protrudes approx. 4 cm. - The rulebook, scenario booklet, the Raccoon City Dashboard and the large 4 x 4 tile are stored separately in the box. - transport and tip-proof - vertical storage possible. The set includes: - 1 foam tray with 5 compartments for tiles, terrain elements, tokens and dice (AFHW030BO)- 1 foam tray with 36 compartments for miniatures, terrain elements, tokens, health tracks, Dials (AFCZ050BO)- 1 foam insert with 9 compartments + plastic card holder for playing cards and tokens (AFEE035BO + 59879)- 1 foam cover. Your 28 miniatures will find a quiet place in the insert with its 36 compartments. From Jill Valentine to the simple zombies to Nemesis' final form - thanks to the precise fit, all miniatures have a firm hold. Even when being transported through a zombie-infested street, nothing slips out of place. The soft, fine-pored foam protects delicate parts from breaking off and the colours of your painted models from scratches and paint abrasion. Once your figures are safely packed, let's move on to your play material. You can organise this as you wish. In the insert with the 36 compartments, you can sort Health Tracks, Player and Gameplay Tokens, as well as Terrain Elements and Dials into the compartments that are not occupied by miniatures. In the insert with the 5 compartments, you can store your various tiles in the large compartment and use the remaining 4 compartments for Terrain Elements, Tokens and Dice. The last insert is particularly suitable for your playing cards. 8 card compartments with finger-thick cut-outs are waiting for your cards. The finger-thick cut-outs make it easier for you to remove the individual stacks. We have also included an additional plastic card holder in the set for your small-format cards. This can be easily inserted into one of the larger compartments. Of course, your cards also fit into the individual compartments with a protective cover. You can use the last compartment again for game material. The foam lid supplied closes the whole thing so that the miniatures are securely packed all round and nothing bumps against the lid of the box during transport. You place the rulebook, scenario booklet, the Raccoon City dashboard and the large 4 x 4 tile on the foam lid. The foam inserts have the following dimensions: - AFHW030BO: 285 mm x 285 mm x 30 mm total height (20 mm usable height + 10 mm foam base)- AFCZ050BO: 285 mm x 285 mm x 50 mm total height (40 mm usable height + 10 mm foam base)- AFEE035BO: 285 mm x 285 mm x 35 mm total height (25 mm usable height + 10 mm foam base)- high-quality, fine-pored foam- chlorine-free and acid-free- Made in Germany. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted. - thermoplastic- no assembly required - ready to play- 3D printed in Germany
